VOL.5/2024

PROFILE

ALLOY® is the leading Commercial Partitioning Systems Provider in Asia. Our innovative, spatial partitioning systems are designed to meet the particular needs of office, banking, healthcare and retail environments.

Extensive Product Offering

ALLOY® Partitioning Systems is a comprehensive and integrated range of fixed or relocatable systems for:

- Drywall Partitioning
- Doors and Frames
- Glazed Frame Partitioning
- Aluminium skirting and wire way systems.

All suites are completely integrated and interchangeable, allowing design consultants with the opportunity to be totally creative with their design concepts.

Service

Our commitment is to provide the highest level of service and complete customer satisfaction. Our Sales Associates and Distributors are always available to assist you in selecting the right system for your requirements. Standard CAD details are also immediately available for download on www.alloy-asia.com.

Product Quality and Finish

ALLOY® Partitioning Systems are engineered for speed and ease of installation. When installed properly, **ALLOY®** provides a crisp and clean finish that accentuates the design space.

Our Systems are designed in close cooperation with Saint-Gobain Thai Gypsum to ensure that acoustic and fire rated performance characteristics are adhered to. **ALLOY®** systems is certified for use with **Gyproc®** plasterboard systems.

All our products are finished using a proprietary polymer etched, sandblasted process, and our latest product range is now available in a stunning Linished Stainless Steel finish.

ALLOY® Hardware is a range of premium door hardware, carefully handpicked to integrate with our partitioning systems. **ALLOY®** Hardware comes with an full 5 year guarantee when used with our partitioning systems.

Please contact our Representative Office in your city for a confidential review of your requirements, or simply visit our website on www.alloy-asia.com or www.buildersmart.com

ALLOY 40

ALLOY[®] 40 Glazed Partitioning System modules are separated by slim, vertical aluminium mullions, or alternatively clear dry, transparent PETG joints can be used to create seamless contours.

Our frameless glazed doors, or veneer timber doors combine to provide the designer with an endless variation of minimalist workspace options.

ALLOY[®] 40 glass modules with 10mm glass can achieve up to 32 Rw db in accordance with BS 2750: 1980. 12mm glass modules will achieve up to 33 Rw db acoustic performance.

ALLOY 100

ALLOY®100 is noted for its exceptional performance, strength and acoustical qualities. The system uses a 64mm stud plasterboard construction and is engineered to accommodate 45mm thick, full height 2.8metre doors.

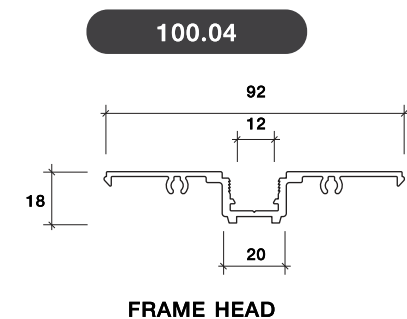

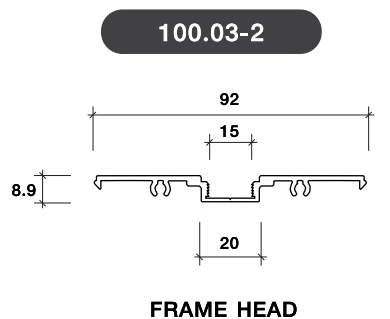

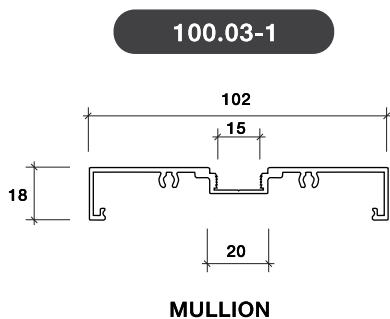

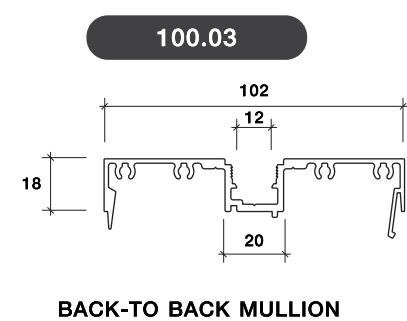

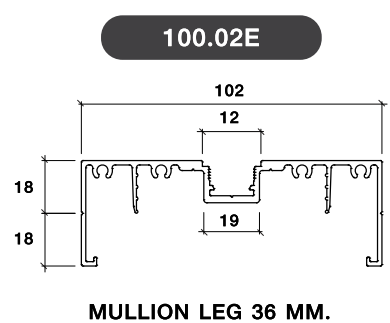

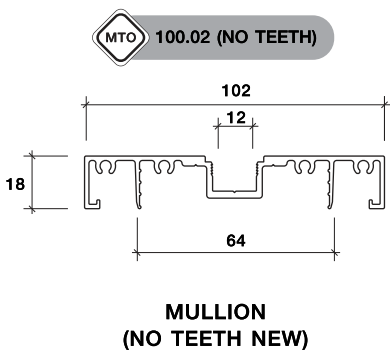

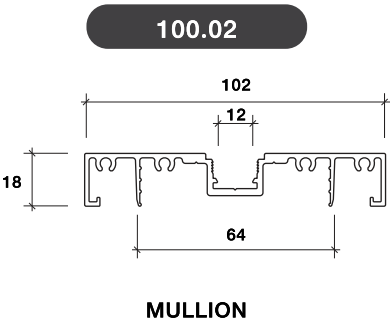

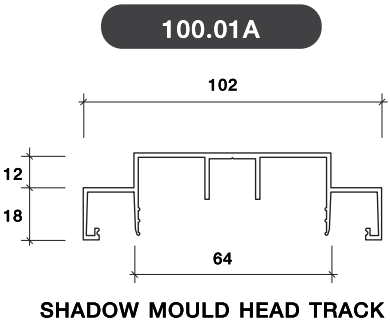

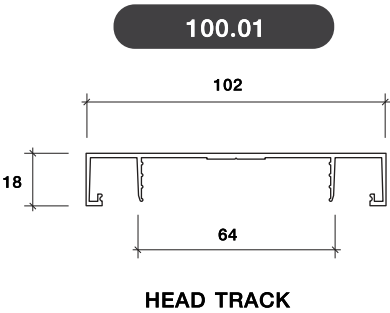

System strength is obtained through a patented Interlock™ mechanism and a series of concealed screw flutes that fastens the system securely. The overall performance attributes of this system has made it an established specification product amongst designers and specifiers alike.

Aerospan

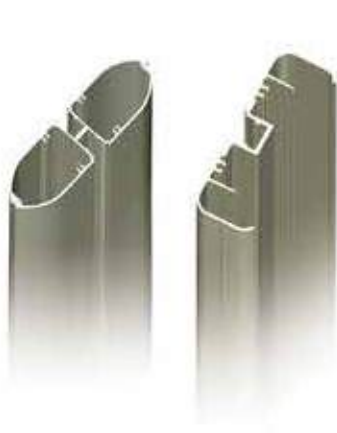

Inspired by the aerodynamic curves of an aeroplane in-flight, the clean curves of the Aerospan glazing system project a modern aesthetic, while offset mounted vertical mullions add visual interest.

Ellipse

This relocatable partitioning system captures the strength and performance characteristics of ALLOY® 100, but with a soft look and feel. The rounded features of the Ellipse system makes this system an exciting new alternative for glazed and drywall partition combinations. Both systems utilize patented systems construction to meet the rigorous strength and performance characteristics of ALLOY® Partitioning Systems.

ALLOY DOUBLE GLAZING

ALLOY® Front/Double Glazed Partitioning Systems were created to meet the specific aesthetic requirements of an open plan environment, keeping necessary acoustic containment a key factor in the overall design process.

Accommodating glass thicknesses of 8mm or 10 mm, the system is one of the most economical performance glazing systems available in the market today.

Product and company names in this catalog may be the registered trademarks of their respective owners, and may not be reproduced, adapted or create derivative works from, without specific written permission. ALLOY DOUBLE GLAZING SYSTEMS

Accoustic Performance

Accoustic plays an important role in the design of an effective workspace. ALLOY DSG is engineered to allow specialist consultants to effectively manage sound absorption and transmission characteristics of a particular workspace using a combination of sound absorptive and reflective paneling afixed to DSG universal framework.

DSG system also meet stringent sound transmission test, achieving an impressive 42 dB rating for the performance double glazed paneling. and an STC performance exceeding 45 dB for the solid panel system. A qualified expert in ALLOY should always be consulted when designing your acoustic requirements for your office workspace.

ALLOY SKIRTING

...Add to Beauty in Wall system

Alloy® Skirting comes in three stylish designs — a flat skirting, screw-on profile and our All New Ezy-Fit square profile. All designs are available in 50 mm, 100 mm and 150 mm designs.

Alloy® Skirting's premium quality surface finish is achieved through a proprietary polymer etched, sandblasted process.

ALLOY SKIRTING SYSTEMS

ALLOY Wire Management

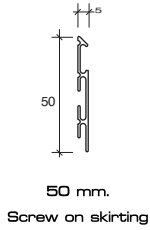

...Add to Beauty in Wall system

Alloy® Wire Management is a 100 mm high double compartment channel with removable cover plate and matching screw-on skirting. Compartments are designed to carry electrical and communications wiring that would normally be otherwise wired inside partitioning walls.

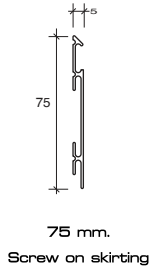

Running the cabling and wiring within the Wire Management compartment ensures easy access to the cabling during and after the completion of an office interior construction.

ALLOY FINISHING AND ALLOY STAINLESS FINISHING

ALLOY FINISHING ...Add to Beauty in Wall system

Powder coating Finishes.

ALLOY® is available in a multitude of performance powder coating that has very good scratch resistance properties, and in a wide range of fashionable metallic and pearlescent colours.

Our powder coat colours carry a twenty five year guarantee for interior applications, or a fifteen year guarantee for external finishes.

Product and company names in this catalog may be the registered trademarks of their respective owners, and may not be reproduced, adapted or create derivative works from, without specific written permission. Products displayed in this catalog may be protected by various patents and licenses as applicable.

ALLOY FINISHING

Anodized Finishes

One of the most distinguishing features of ALLOY® is our surface finish. All our systems are carefully finished in a polymer etched surface treatment prior to anodizing to a 15-20 micron thickness.

Our latest innovation also includes Stainless Anodizing, a process that converts our natural anodized aluminium product into a luxurious, hairline stainless finish.

ALLOY® Partitioning systems has been designed for exclusive use with  Thai Gypsum Product which the world's leader in Gypsum Wall and Ceiling Solution. ALLOY® System appropriate to use with BPB Gypwall with ensure maximum sound and fire rating performance with ASTM and TIS Standards guarantee.

Product Data Sheet									
Corro-Coat PE-F Series 1403, 1407 and 1408									
Product Description	Corro-Coat PE-F Series 1403, 1407 and 1408 are exterior durable polyester TGIC powder coatings developed primarily to satisfy the requirements for colour stability, gloss retention and corrosion protection. Corro-Coat PE-F Series 1403, 1407 and 1408 provide a uniform flow and finish even after recycling.								
Application Areas	Primary areas of application are architectural aluminum extrusions and claddings. The overall excellent properties and attractive appearance of Corro-Coat PE-F Series 1403, 1407 and 1408 make them suitable for application to other ferrous and non-ferrous substances. When screen printing or sealants are used, it is advised to run separate trials to ensure compatibility and to meet the required performance criteria.								
Pre-treatment	The overall quality of the coating system is largely dependent on the type and quality of the pre-treatment. The recommended types of pre-treatment for the most frequently used substrates are: <table border="0"> <tr> <td>Aluminum</td><td>Chromate conversion</td></tr> <tr> <td>Steel</td><td>Zinc phosphate</td></tr> <tr> <td>Zinc coated steel</td><td>Zinc phosphate or chromate conversion</td></tr> <tr> <td>Final rinse (deionized)</td><td>The last running water from the object should be tested at 20°C. The readings obtained should measure below 30µS/cm.</td></tr> </table>	Aluminum	Chromate conversion	Steel	Zinc phosphate	Zinc coated steel	Zinc phosphate or chromate conversion	Final rinse (deionized)	The last running water from the object should be tested at 20°C. The readings obtained should measure below 30µS/cm.
Aluminum	Chromate conversion								
Steel	Zinc phosphate								
Zinc coated steel	Zinc phosphate or chromate conversion								
Final rinse (deionized)	The last running water from the object should be tested at 20°C. The readings obtained should measure below 30µS/cm.								
Curing Schedules	20 minutes at 180°C object temperature 15 minutes at 190°C object temperature 10 minutes at 200°C object temperature								
Colour Selection	Corro-Coat PE-F Series 1403, 1407 and 1408 are available in a wide assortment of custom-made colours and metallic finishes, including RAL and NCS.								
Powder Application	Corro-Coat PE-F Series 1403, 1407 and 1408 are available for Corona or Tribo charging equipment.								
Product Warranty	Corro-Coat PE-F Series 1403, 1407 and 1408 are backed by a 10-year product warranty system for exterior application and a 25-year product warranty system for interior application when used on architectural aluminum substrates.
